

Noise Blocker Swing Mounts

Hard disk anti-vibration mountings, for acoustic isolation of vibrational noise from a hard disk to the PC chassis.
Most effective with 7,200 10,000 and 15,000 rpm hard disks and best solution for silent aluminium cases.

Kit contents

- 4 x type A angle brackets (with rubber mounts)
- 4 x type B angle brackets (without rubber mounts)
- 8 x 3mm screws

Installation instructions

1. First screw all four type B aluminium angle brackets to both sides of your hard disk
2. Then, screw the type A (rubber buffered) angle brackets to the type B brackets
3. Finally, slide the complete hard disk into a free 5.25" slot and secure it using four screws
4. Enjoy the silence!

Please note

The four hard disk screws are included with your PC case, not with this kit!
